Skills

demand planning

Applied to demand planning baseline through documented preparation, execution and review.

inventory policy

Applied to inventory policy review through documented preparation, execution and review.

forecast review

Applied to sales and operations planning through documented preparation, execution and review.

capacity coordination

Applied to demand planning baseline through documented preparation, execution and review.

Excel

Applied to inventory policy review through documented preparation, execution and review.

scenario analysis

Applied to sales and operations planning through documented preparation, execution and review.

ERP

Applied to demand planning baseline through documented preparation, execution and review.

service metrics

Applied to inventory policy review through documented preparation, execution and review.

Certifications

Supply-chain planning workshop

Meridian Professional Learning Studio (fictional) 2023 continuing learning - not a licence or certification Demand planning and capacity coordination in the context of supply chain planner work. Used reflective exercises and a bounded practice example related to demand planning baseline.

Commercial documentation practicum

Meridian Professional Learning Studio (fictional) 2024 continuing learning - not a licence or certification Inventory policy and excel in the context of supply chain planner work. Used reflective exercises

Summary

Fictional demonstration candidate. All employers, education, projects, achievements and outcomes are illustrative and unverified. Not a real application or licence record. Supply Chain Planner with an illustrative 13-year career in supply networks, purchasing and material operations. Combines demand planning, inventory policy, forecast review with disciplined documentation, practical coordination and clear communication. The sample career progresses from focused execution to independent workstream ownership, with responsibilities and boundaries described for each appointment. Selected work includes demand planning baseline, inventory policy review and sales and operations planning. These examples explain the original problem, individual contribution, deliverables, review approach and remaining limitations rather than relying on unsupported headline claims. Prepared for experienced supply chain planner opportunities requiring dependable delivery, thoughtful professional judgement and collaboration. The qualification narrative includes MBA in Supply Chain Management. Every named organisation and outcome in this record is fictional; professional eligibility is not independently established. Turn a clear brief into dependable supply networks, purchasing and material operations work: understand the context, apply demand planning and inventory policy, record the evidence and explain the limitations before handover.

Experience

Supply Chain Planner - Meridian Supply Operations (fictional)

2022-07 - Present

Independent ownership of scoped supply chain planner work, coordinating contributors and making review requirements explicit. Includes the first two selected work examples. Reconciled historical patterns and agreed review scenarios. Compared bounded demand and lead-time assumptions. Led brief clarification and prioritised work using demand planning, inventory policy and forecast review. Raised unresolved constraints before committing to the next stage. Coordinated peer reviews and handover preparation; used a planning and assumptions workbook to distinguish completed work, assumptions and follow-up needs. Supported colleagues with practical examples of capacity coordination and maintained a concise learning record after important assignments. Illustrative career responsibilities. Employer confirmation and underlying work records are not supplied.

Senior Supply Chain Planner - Northline Supply Operations (fictional)

2018-07 - 2022-06

Owned defined assignments and supported cross-functional coordination. Developed deeper practice in forecast review and capacity coordination. Created a shared assumption and decision register. Translated incoming requirements into a sequenced plan and aligned responsibilities with the project or service owner. Applied excel and scenario analysis to resolve delivery questions while maintaining source and decision notes. Introduced reusable working documents and reviewed exceptions with the responsible specialist rather than silently changing scope. Prepared a operating improvement and handover record so the next team could understand the work and remaining questions. Illustrative career responsibilities. Employer confirmation and underlying work records are not supplied.

Supply Chain Planner - Cedarbridge Supply Operations (fictional)

2015-07 - 2018-06

Progressed from supported tasks to independently managed assignments, with review available for unfamiliar or higher-risk decisions. Handled recurring work involving demand planning and inventory policy using a documented

preparation and review process. Supported inventory policy review by organising inputs, maintaining issue notes and incorporating reviewer feedback. Coordinated colleagues and internal stakeholders using concise status updates, clear questions and agreed next steps. Improved record consistency through erp and documented handover expectations. Illustrative career responsibilities. Employer confirmation and underlying work records are not supplied.

Assistant Supply Chain Planner - Cedarbridge Supply Operations (fictional)

2013-07 - 2015-06

Built practical foundations through supervised assignments, routine documentation and feedback from experienced colleagues. Assisted with demand planning and forecast review within an agreed scope and escalated unfamiliar work. Prepared inputs and checked completeness before passing work to the responsible reviewer. Maintained task records and learned to communicate assumptions, constraints and observed problems clearly. Applied review feedback to subsequent assignments and developed a dependable working routine. Illustrative career responsibilities. Employer confirmation and underlying work records are not supplied.

Projects

Demand planning baseline

Fictional internal work programme in supply networks, purchasing and material operations; not a real client case study. Problem: Teams used conflicting demand assumptions. Objective: Create a workable response to this issue through demand planning, explicit review criteria and practical documentation. Agree the boundaries before execution and retain unresolved points for follow-up. Supply Chain Planner; owned the stated workstream, not the full organisation or every collaborator contribution. Reconciled historical patterns and agreed review scenarios. Prepared the scope with the commissioning team, identified unresolved inputs and used demand planning to turn the brief into a sequenced work package. Applied inventory policy and forecast review while coordinating reviews with the designated owner. Kept decision notes so collaborators could separate facts, assumptions and changes. Assembled the handover material, explained open limitations and agreed which items needed further review rather than presenting them as completed. Methods: demand planning; inventory policy; forecast review; capacity coordination Deliverables: Demand planning baseline - scoped brief; Demand planning baseline - reviewed working package; Demand planning baseline - handover and learning summary Review: Reviewed the scoped output against the agreed brief, recorded exceptions and checked that key conclusions could be traced to observations. The review package calls for a planning and assumptions workbook and a named human reviewer. Illustrative outcome: the team adopted a repeatable approach for demand planning baseline, with clearer ownership and reviewable records. This is a fictional qualitative result; no real performance measurement or external acceptance evidence is supplied. Limitations: Synthetic demonstration only. Suppliers, shipment data and savings are illustrative; no purchasing authority or real vendor endorsement is implied. No underlying client documents, independently verified measurements or signed approval records are attached.

Inventory policy review

Fictional internal work programme in supply networks, purchasing and material operations; not a real client case study. Problem: Replenishment settings did not reflect service needs. Objective: Create a workable response to this issue through inventory policy, explicit review criteria and practical documentation. Agree the boundaries before execution and retain unresolved points for follow-up. Supply Chain Planner; owned the stated workstream, not the full organisation or every collaborator contribution. Compared bounded demand and lead-time assumptions. Prepared the scope with the commissioning team, identified unresolved inputs and used forecast review to turn the brief into a sequenced work package. Applied capacity coordination and excel while coordinating reviews with the designated owner. Kept decision notes so collaborators could separate facts, assumptions and changes. Assembled the handover material, explained open limitations and agreed which items needed further review rather than presenting them as completed. Methods: inventory policy; forecast review; capacity coordination; Excel Deliverables: Inventory policy review - scoped brief; Inventory policy review - reviewed working package; Inventory policy review - handover and learning summary Review: Reviewed the scoped output against the agreed brief, recorded exceptions and checked that key conclusions could be traced to observations. The review package calls for a traceability or supplier review and a named human reviewer. Illustrative outcome: the team adopted a repeatable approach for inventory policy review, with clearer ownership and reviewable records. This is a fictional qualitative result; no real performance measurement or external acceptance evidence is supplied. Limitations: Synthetic
