

ARNAV MEHTA

Automation Test Engineer

Playwright, Selenium, TypeScript

Chennai, India | arnav.mehta@example.com | ROLE 04-03

FICTIONAL SAMPLE - all employers, qualifications and outcomes are illustrative and unverified.

EXECUTIVE SUMMARY

Automation Test Engineer with an illustrative 11-year career in software quality engineering and release assurance. Combines playwright, selenium, typescript with disciplined documentation, practical coordination and clear communication. The sample career progresses from focused execution to independent workstream ownership, with responsibilities and boundaries described for each appointment.

Selected work includes stable end-to-end framework, parallel regression service and flaky-test reduction. These examples explain the original problem, individual contribution, deliverables, review approach and remaining limitations rather than relying on unsupported headline claims.

Prepared for experienced automation test engineer opportunities requiring dependable delivery, thoughtful professional judgement and collaboration. The qualification narrative includes Postgraduate diploma in Test Automation. Every named organisation and outcome in this record is fictional; professional eligibility is not independently established.

AT A GLANCE

11 years ILLUSTRATIVE CAREER	4 CAREER APPOINTMENTS	3 WORK EXAMPLES	2 EDUCATION RECORDS
---------------------------------	--------------------------	--------------------	------------------------

CORE COMPETENCIES

- Playwright / Selenium
- TypeScript / Python
- API automation / CI pipelines
- test architecture / reporting

PROFESSIONAL MISSION

Turn a clear brief into dependable software quality engineering and release assurance work: understand the context, apply playwright and selenium, record the evidence and explain the limitations before handover.

Career family: Software Testing & Quality | Snapshot: 2026-09-22

PROFESSIONAL EXPERIENCE / RECENT

Automation Test Engineer

Meridian Quality Engineering (fictional)

Jul 2024 - Present | Chennai, India

Independent ownership of scoped automation test engineer work, coordinating contributors and making review requirements explicit. Includes the first two selected work examples.

- Created resilient fixtures and component-level helpers.
- Partitioned independent suites and isolated test data.
- Led brief clarification and prioritised work using playwright, selenium and typescript. Raised unresolved constraints before committing to the next stage.
- Coordinated peer reviews and handover preparation; used a test strategy and coverage map to distinguish completed work, assumptions and follow-up needs.
- Supported colleagues with practical examples of python and maintained a concise learning record after important assignments.

Illustrative career responsibilities. Employer confirmation and underlying work records are not supplied.

Senior Automation Test Engineer

Northline Quality Engineering (fictional)

Jul 2020 - Jun 2024 | Chennai, India

Owned defined assignments and supported cross-functional coordination. Developed deeper practice in typescript and python.

- Diagnosed timing dependencies and recorded failure evidence.
- Translated incoming requirements into a sequenced plan and aligned responsibilities with the project or service owner.
- Applied api automation and ci pipelines to resolve delivery questions while maintaining source and decision notes.
- Introduced reusable working documents and reviewed exceptions with the responsible specialist rather than silently changing scope.
- Prepared a release-readiness assessment so the next team could understand the work and remaining questions.

Illustrative career responsibilities. Employer confirmation and underlying work records are not supplied.

PROFESSIONAL WORKING PRINCIPLES

- Convert acceptance criteria into risk-based tests with observable expected results.
- Keep representative test data separate from confidential production records.
- Explain coverage limits and residual risks rather than claiming that testing proves perfection.

PROFESSIONAL EXPERIENCE / EARLIER

Automation Test Engineer

Cedarbridge Quality Engineering (fictional)

Jul 2017 - Jun 2020 | Chennai, India

Progressed from supported tasks to independently managed assignments, with review available for unfamiliar or higher-risk decisions.

- Handled recurring work involving playwright and selenium using a documented preparation and review process.
- Supported parallel regression service by organising inputs, maintaining issue notes and incorporating reviewer feedback.
- Coordinated colleagues and internal stakeholders using concise status updates, clear questions and agreed next steps.
- Improved record consistency through test architecture and documented handover expectations.

Illustrative career responsibilities. Employer confirmation and underlying work records are not supplied.

Assistant Automation Test Engineer

Cedarbridge Quality Engineering (fictional)

Jul 2015 - Jun 2017 | Chennai, India

Built practical foundations through supervised assignments, routine documentation and feedback from experienced colleagues.

- Assisted with playwright and typescript within an agreed scope and escalated unfamiliar work.
- Prepared inputs and checked completeness before passing work to the responsible reviewer.
- Maintained task records and learned to communicate assumptions, constraints and observed problems clearly.
- Applied review feedback to subsequent assignments and developed a dependable working routine.

Illustrative career responsibilities. Employer confirmation and underlying work records are not supplied.

SELECTED CONTRIBUTIONS

Stable end-to-end framework. Created resilient fixtures and component-level helpers. The achievement is the described workstream contribution; independent outcome evidence is not supplied.

Parallel regression service. Partitioned independent suites and isolated test data. The achievement is the described workstream contribution; independent outcome evidence is not supplied.

Flaky-test reduction. Diagnosed timing dependencies and recorded failure evidence. The achievement is the described workstream contribution; independent outcome evidence is not supplied.

SELECTED WORK / 01

Stable end-to-end framework

P1 | Jan 2025 - Jun 2025 | FICTIONAL WORK EXAMPLE

Context. Fictional internal work programme in software quality engineering and release assurance; not a real client case study.

Problem. Brittle selectors produced noisy test failures.

Objective. Create a workable response to this issue through playwright, explicit review criteria and practical documentation. Agree the boundaries before execution and retain unresolved points for follow-up.

Contribution and ownership. Automation Test Engineer; owned the stated workstream, not the full organisation or every collaborator contribution.

- Created resilient fixtures and component-level helpers.
- Prepared the scope with the commissioning team, identified unresolved inputs and used playwright to turn the brief into a sequenced work package.
- Applied selenium and typescript while coordinating reviews with the designated owner. Kept decision notes so collaborators could separate facts, assumptions and changes.
- Assembled the handover material, explained open limitations and agreed which items needed further review rather than presenting them as completed.

Methods. Playwright / Selenium / TypeScript / Python

Deliverables. Stable end-to-end framework - scoped brief; Stable end-to-end framework - reviewed working package; Stable end-to-end framework - handover and learning summary

Review. Reviewed the scoped output against the agreed brief, recorded exceptions and checked that key conclusions could be traced to observations. The review package calls for a test strategy and coverage map and a named human reviewer.

Illustrative outcome: the team adopted a repeatable approach for stable end-to-end framework, with clearer ownership and reviewable records. This is a fictional qualitative result; no real performance measurement or external acceptance evidence is supplied.

Suggested evidence (not supplied): test strategy and coverage map; defect reproduction record; release-readiness assessment.

SPECIALIST PRACTICE

Quality evidence

The sample focuses on playwright, selenium, typescript. Approvals, supervision and specialist input are identified in each work package; work outside this scope is referred to the designated responsible person.

Peer learning and practical guidance. Created short examples on playwright and python for colleagues. Separated personal preferences from agreed team procedures and recorded useful questions.

Review and handover discipline. Facilitated practical reviews of parallel regression service, ensuring that unresolved issues retained a named owner rather than disappearing from final presentations.

Results refer to a bounded sample system and test window, not a guarantee of defect-free software.

SELECTED WORK / 02 AND 03

Parallel regression service

P2 | Jan 2026 - Jun 2026 | Meridian Quality Engineering (fictional)

Problem. Sequential tests delayed feedback.

Objective. Create a workable response to this issue through selenium, explicit review criteria and practical documentation. Agree the boundaries before execution and retain unresolved points for follow-up.

Ownership. Automation Test Engineer; owned the stated workstream, not the full organisation or every collaborator contribution.

- Partitioned independent suites and isolated test data.
- Prepared the scope with the commissioning team, identified unresolved inputs and used typescript to turn the brief into a sequenced work package.
- Applied python and api automation while coordinating reviews with the designated owner. Kept decision notes so collaborators could separate facts, assumptions and changes.
- Assembled the handover material, explained open limitations and agreed which items needed further review rather than presenting them as completed.

Methods. Selenium / TypeScript / Python / API automation

Delivered. Parallel regression service - scoped brief; Parallel regression service - reviewed working package; Parallel regression service - handover and learning summary

Illustrative outcome: the team adopted a repeatable approach for parallel regression service, with clearer ownership and reviewable records. This is a fictional qualitative result; no real performance measurement or external acceptance evidence is supplied.

Suggested evidence (not supplied): test strategy and coverage map; defect reproduction record; release-readiness assessment.

Flaky-test reduction

P3 | Jan 2021 - Jun 2021 | Northline Quality Engineering (fictional)

Problem. Intermittent failures reduced confidence in builds.

Objective. Create a workable response to this issue through typescript, explicit review criteria and practical documentation. Agree the boundaries before execution and retain unresolved points for follow-up.

Ownership. Automation Test Engineer; owned the stated workstream, not the full organisation or every collaborator contribution.

- Diagnosed timing dependencies and recorded failure evidence.
- Prepared the scope with the commissioning team, identified unresolved inputs and used api automation to turn the brief into a sequenced work package.
- Applied ci pipelines and test architecture while coordinating reviews with the designated owner. Kept decision notes so collaborators could separate facts, assumptions and changes.
- Assembled the handover material, explained open limitations and agreed which items needed further review rather than presenting them as completed.

Methods. TypeScript / Python / API automation / CI pipelines

Delivered. Flaky-test reduction - scoped brief; Flaky-test reduction - reviewed working package; Flaky-test reduction - handover and learning summary

Illustrative outcome: the team adopted a repeatable approach for flaky-test reduction, with clearer ownership and reviewable records. This is a fictional qualitative result; no real performance measurement or external acceptance evidence is supplied.

Suggested evidence (not supplied): test strategy and coverage map; defect reproduction record; release-readiness assessment.

EDUCATION AND SPECIALIST LEARNING

Postgraduate diploma in Test Automation

Asterbridge Institute of Professional Studies (fictional institution)

Jul 2014 - May 2015 | completed - fictional record

Focus: Playwright, Selenium, Python. Specialist study on stable end-to-end framework; an illustrative learning project, not a published result.

B.Tech in Information Technology

Cedarhaven College of Applied Studies (fictional institution)

Jul 2010 - May 2014 | completed - fictional record

Focus: TypeScript, API automation, CI pipelines. Applied coursework in playwright, documentation and reviewed practical assignments.

CONTINUING PROFESSIONAL DEVELOPMENT

Risk-based testing workshop (2023). Playwright and python in the context of automation test engineer work. Used reflective exercises and a bounded practice example related to stable end-to-end framework.

Test-data design practicum (2024). Selenium and api automation in the context of automation test engineer work. Used reflective exercises and a bounded practice example related to parallel regression service.

Defect communication clinic (2025). Typescript and ci pipelines in the context of automation test engineer work. Used reflective exercises and a bounded practice example related to flaky-test reduction.

Provider for these illustrative learning records: Meridian Professional Learning Studio (fictional). Not a licence or certification.

LANGUAGES AND WORKING PREFERENCES

English and Hindi - professional working proficiency in this fictional record.

Work arrangement: hybrid; remote feasibility discussed per role. Relocation: open to discussion - sample preference. Availability: not confirmed; discuss before an interview.

CREDENTIAL AND EVIDENCE STATUS

Results refer to a bounded sample system and test window, not a guarantee of defect-free software.

Synthetic qualification and institution names illustrate profile fields only; they are not a validated qualification route or recognised accreditation claim.

No real referee, endorsement, award, publication, membership or licence is supplied.

Use for templates, product demonstrations and test data only. Replace fictional claims and remove the demo label only after approval of real candidate information.

Contact placeholder: arnav.mehta@example.com. No phone, live profile URL or verified reference is supplied.

Complete machine-readable data: profile.json. Interactive companion: portfolio.html. Reference CV used for structure only; this is not Ajay Prajapat's biography.
